- Simple installation with cartridge refill system
- Fast printing (2-4 minutes per run)
- Economical production cost (\$0.02 per sq inch)
- Strong impact durability

COMPACT DESKTOP MODEL

Flatbed Lift Attachment

LogoJET Express ~ Item # LJEXP

LogoJET Express (above) is our most compact desktop printer that can print up to 16 golf balls with 16 different images simultaneously. Not only is it compact, but it's also "out of the box friendly". All the trays and software are specially fitted for the printer, so all you have to do is load the product and simply press print!

The **LogoJET 24 Golf Ball Printer** (right) features a larger capacity, printing up to 24 golf balls at once. All LogoJET models can handle most types of images including JPG, GIF, BMP, PNG, etc. when used with LogoExpress software. They are also compatible with most third party software (Adobe Illustrator, Photoshop, Corel, etc), allowing you to create custom templates for any product you wish to print on. Using Epson's print driver and custom profile settings, you can imprint high-quality photographic images on to virtually any product substrate. The applications are endless!

24 Golf Ball Printer ~ Item # LJEXP24

PRINTS UP TO 24 GOLF BALLS AT ONCE!

NO PRE-SPRAY REQUIRED!

LogoJET PRO H3 ~ Item # LJPROH3

LogoJET PRO H3 is our latest and most advanced release for higher capacity production. With a maximum imprint area of 13" W x 25" L x 5" H, and easily repositionable tray fixtures, **LogoJET PRO H3** makes full color printing easy on a variety of substrates **without pretreatment!**

Some new features of the LogoJET PRO H3 include:

Anodized aluminum flatbed ~ Print custom templates directly on to flatbed and wipe off easily with acetone.

Automatic platform height adjustment ~ Accommodates different sized products up to 5" in height.

Vacuum pump (optional) ~ Holds light products in place on bed.

Bulk ink delivery system ~ Reduces maintenance and refills.

Temperature controlled halogen lamp & heated platform (optional) ~ Promote better ink bonding and imprint durability.

LJF5 and LJ7 are special sprays exclusive to LogoJet. LJF5 is for surface preparation before printing and LJ7 is a fixative coating for after printing. This process secures durability of images on golf balls and helps images to dry fast. Also they protect the logo from dirt and scratches.

LogoJET is pleased to announce that a **NEW Direct Ink** is **NOW AVAILABLE** for the **LogoJet PRO H3** model, where **no fixatives or pre-treatment is required**. This breakthrough in pigments has been proven to match the durability of our existing spray fixative method on a variety of substrates including leather, vinyl, ABS plastics, ceramics and more!

For qualification of your custom product using our new solvent ink technology, please submit samples.
