- Works with any third-party software
- Simple installation with cartridge refill system
- Fast printing (2-4 minutes per run)
- Economical production cost (\$0.02 per sq inch)
- Strong impact durability

COMPACT DESKTOP  
MODEL

LogoJET Express ~ \$8,900.00

**LogoJET Express** (above) is our most compact desktop printer that can print up to 16 golf balls with 16 different images simultaneously. Not only is it compact, but it's also "out of the box friendly". All the trays and software are specially fitted for the printer, so all you have to do is load the product and simply press print!

BUILT-IN  
FLAT-BED

LogoJET PLUS ~ \$11,500.00

The **LogoJET PLUS** (left) and the **LogoJET 24 Golf Ball Printer** (right) feature a larger capacity, printing up to 24 golf balls at once. All LogoJET models can handle most types of images including JPG, GIF, BMP, PNG, etc. when used with LogoExpress software. They are also compatible with most third party software (Adobe Illustrator, Photoshop, Corel, etc), allowing you to create custom templates for any product you wish to print on. Using Epson's print driver and custom profile settings, you can imprint high-quality photographic images on to virtually any product substrate. The applications are endless!

PRINTS UP TO 24  
GOLF BALLS AT ONCE!

24 Golf Ball Printer ~ \$9,900.00

LogoJET PRO H3 ~ \$21,500.00

**LogoJET PRO H3** is our latest and most advanced release for higher capacity production, at a print speed of 2-3 minutes per print run. With a maximum imprint area of 13" W x 22" L x 5" H, and easily repositionable tray fixtures, **LogoJET PRO H3** can be used to print full color digital images directly on to a variety of substrates.

**Some of the new features of the LogoJET PRO H3 model include:**

- Automatic platform height adjustment – to accommodate different sized products up to 5" in height.
- Vacuum pump – when activated, products are held in place on the platform by vacuum suction pressure.
- Reconfigured bulk ink delivery system - reduces maintenance and refills.
- Temperature controlled halogen lamp AND heated platform - to promote better ink bonding and imprint durability.

**LJF5** and **LJ7** are special sprays exclusive to LogoJet. LJF5 is for surface preparation before printing and LJ7 is a fixative coating for after printing. This process secures durability of images on balls and help images to dry fast. Also they protect the logo from dirt and scratches.

LogoJET is pleased to announce that a **NEW Direct Ink** is **NOW AVAILABLE**, where **no fixatives or pre-treatment is required**. This breakthrough in pigments has been proven to match the durability of our existing spray fixative method on a variety of substrates including leather, vinyl, ABS plastics, ceramics and more!

For qualification of your custom product using our new solvent ink technology, please submit samples.
